For the third consecutive year Lexington reduced its residential trash generation. In FY09 Lexington's overall trash tonnage was reduced by 271 tons reducing disposal costs by nearly \$20,000. Recycling tonnage was also significantly lower in FY09.

Curbside collection data show that nearly 10% of Lexington households don't regularly recycle. If you're not recycling come by the new Public Services Building and at 201 Bedford Street to pick up your recycling bins, compost bins or rain barrels and help the Town reduce its trash bill and help reduce global warming.

why recycle?

Recycling saves money, creates jobs and reduces climate change. For every ton we recycle, we save 17 trees, 2 barrels of oil, 7000 gallons of water and over 3000 pounds of air pollutants.

In FY09 trash was reduced by 271 tons resulting in a savings of almost \$20,000 and compost revenues totaling \$330,000 were generated out of the Lexington Compost facility.
